

New Business founded in the village to help tackle plastic waste.

"Absolutely amazing quality, so much better than pads and tampons. I can't believe I've only just found out about them! Would definitely recommend!"

Elle Mae Carney, Worsbrough

"Wow I love my new underwear, they are comfortable, look and fit perfectly and I feel more than secure in them. I was a bit naughty and ordered one of each!"

Charlotte Harris.

Disposal of single use menstrual products - tampons, pads and applicators generates **200,000 tonnes** of waste per year.

(<https://www.wen.org.uk/wp-content/uploads/Fact-Sheet-Environmenstrual.pdf>)

Absorbent underwear can stop this.

There is nothing complicated about this underwear, quite the contrary, simply pop on the absorbent underwear (*that looks and feels like normal underwear*) and wear for 8-12 hours.

(* Ensuring you match correctly to your flow; Light Days/ Heavy Days/ Super Heavy options)

Once worn, rinse and add to your washing machine with the rest of your laundry.

Hang dry and wear again.

The underwear has a 4 layer technology sewn within that absorbs and wicks away moisture.

8 styles available offering absorbencies from 1- 5 tampons' worth.

The product has received amazing reviews since the website launched in January this year.

Many customers expressing *"They wish they had found them sooner"*

We have also had customers who suffer with endometriosis who have worn the Super Heavy short and as a result were more active as the shorts offered more comfort and they felt more secure.

Our underwear is lined in either Organic Cotton or Bamboo. Studies show Organic Cotton is one of the kindest fabrics to sit against the skin and when compared to the chemicals found in some disposable sanitary products it is yet another reason to make the swap!

Join the many happy customers swapping to this greener, comfier and easier way to approach your period.
